EXPERIENCE

IT Architect - Test Engineering

Mar 2025 – Present

Nelnet

- Serve as a senior technical contributor for test engineering, driving scalable quality practices across API, database/backend, and UI testing efforts.
- Use Playwright for UI automation, Postman for API testing, and Cursor to support test engineering workflows.
- Leveraged AI-assisted workflows to reduce manual testing estimates by 25% and test preparation effort by 25%, supporting improved requirement coverage and more efficient test execution.
- Guide test architecture and automation approach decisions to improve coverage, maintainability, and alignment with product and system requirements.
- Assess testing tools, processes, and quality workflows for effectiveness, improving consistency, usability, and long-term supportability.
- Collaborate with developers and cross-functional stakeholders to troubleshoot issues, validate requirements, and strengthen release confidence.

Lead - Test Engineering

Jun 2022 – Mar 2025

Nelnet

- Led testing efforts across projects and initiatives to support quality objectives, delivery readiness, and alignment with business and system needs.
- Guided improvements to automation frameworks and testing approaches to strengthen test coverage, maintainability, and execution efficiency.
- Mentored test engineers through knowledge sharing, feedback, and day-to-day support, helping strengthen technical capability and team stability.
- Partnered with stakeholders across testing, development, and delivery teams to support release quality and continuous improvement.

Senior Test Engineer

May 2021 – Jun 2022

Nelnet

- Analyzed business and technical requirements to support effective testing of application functionality, system integrations, data flows, and compliance needs.
- Created and maintained automated test suites covering API, backend/database, and UI testing scenarios.
- Validated outcomes through SQL queries, data analysis, and expected-versus-actual comparisons to confirm data integrity and application behavior.
- Documented, tracked, and retested defects, working closely with developers to support timely resolution.

Test Engineer

Aug 2019 – May 2021

Nelnet

- Supported quality assurance efforts across smoke, regression, interface, API, data, and UI testing.
- Applied manual and automated testing practices throughout SDLC and STLC processes in Agile and Scrum-based environments.
- Created and maintained test cases, test data, and documentation to improve testing reliability and execution readiness.
- Participated in user acceptance testing and release validation activities to help confirm product readiness.

VOLUNTEER EXPERIENCE

Community Engagement / Social Media Support

Messiah Lutheran Church (Ralston, NE) · UNL Parent & Family Association (Lincoln, NE)

- Prepare and post social media content to support community outreach, engagement, and organizational communication.
- Contribute clear, audience-focused messaging and consistent content support for nonprofit initiatives and events.
